Sky Boots

In this passage, Ralph, Eduardo, and Gwyneth talk about Sky Boots.

Ralph:

Sky Boots are not a very good product. First of all, they are way too expensive. A pair of Sky Boots costs \$165, which is far too much to pay for a pair of boots. In addition, they are also very uncomfortable, especially if you wear them all day. Last Saturday I wore a pair of Sky Boots all afternoon and my feet felt like they were going to fall off!

Eduardo:

The best thing about Sky Boots is that they are very durable. Even though my Sky Boots are over four years old, they are still in fantastic condition. They don't have any cracks or tears and the soles are only slightly worn. Aside from a few scuffs, they look like they did the day I bought them, and I wear them every day. I am glad that I bought them.

Gwyneth:

Sky Boots are amazing! I absolutely love them! They are the best looking boots you can buy. My Sky Boots are green and red with a thin black stripe around the heel. I get compliments on them all the time; everyone tells me how cheerful they look. Every other pair of boots I have seen are boring colors, like tan or brown or beige. Sky Boots are exciting! That's why I love them. Everyone should own a pair of Sky Boots ... maybe even two or three pairs!
